

## COPPER SPRAY

5660-70-26

**Product info** High-performance release and assembly paste

**Type** Other

**Manufacturer** Staloc

**Colour** Copper

**Temperature min. °C** -30

**Temperature max. °C** +1 100

**Description** The copper spray is an adhesive, temperature-resistant special lubricant based on copper. It guarantees a long-term penetration and prevents wear, reduction of braking effect, corrosion, operation noise and seizure when applied preventively. Resistance against acids, alkali and saltwater is provided.

The product is most frequently used for the following applications:

- maintenance and replacement of brake systems and components
- replacement of ignition plugs and wheel bolts
- bolted assemblies of exhaust- and catalytic systems
- anticorrosive for engine, gearbox, axles and other automotive components

**Product group** 503
