

P.T.F.E. HOSE, CONVULTUED

1091-00

Product group	110
Inner tube	Convulted P.T.F.E. (Teflon®)
Temperature min. °C	-70
Temperature max. °C	+230
Media	Oil
Reinforcement	One braid of stainless steel wire, SS 2330
Safety factor	1:4
Applications and characteristics	A very flexible high pressure hose due to the convulted inner tube. The hose is suitable for most hazardous environments. Large chemical resistance range, low friction and wide temperature range. Age resistant. The hose will be deleted during 2015 and will be replaced by 1091-01.
Ferrule	4200-30-xx, 3800-30-xx
